Developed by ASHRAE*, its purpose is to standardize communications between building automation devices from different manufacturers, allowing data to be shared across devices and equipment to work together easily.

The integration with XProtect VMS enables two-way event integrations with BACnet devices and servers.

*American Society of Heating, Refrigerating and Air-Conditioning Engineers

What you need to implement this integration:

- **XProtect® BACnet Plugin**
- **XProtect® Corporate 2014 or higher**

The user will need to configure BACnet devices and associate with IP Camera for user defined events. Integrators need to be familiar with the XProtect VMS and the BACnet protocol in order to properly configure this integration.

**With this Integration:**

- Users can communicate with Building Management Systems using the BACnet protocol.
- Events triggered in BACnet devices can be displayed in the Milestone Alarm Manager with accompanying video.

About Milestone
At Milestone, we innovate and achieve together with our partners. When you offer Milestone, you offer more than a video management system. You get the freedom to build a tailor-made surveillance solution that meets your customer’s need – now and in the future. That is the power of our open platform community.

About BACnet
BACnet is a data communication protocol for Building Automation and Control Networks. Developed under the auspices of the American Society of Heating, Refrigerating and Air-Conditioning Engineers (ASHRAE), BACnet is the national standard in more than 30 countries, and an ISO global standard. The protocol is supported and maintained by ASHRAE Standing Standard Project Committee 135 whose members have created and provided the content for the website, www.bacnet.org.
